Dear Parents and Carers

On Friday 17th March, we will be having a Science Day to celebrate British Science week.

The theme for this year's British Science Week is "Change", encouraging children to think about and investigate the changes happening in the world all around us; from seasons and climate, to materials and energy. It is also a chance for children to consider the changes they can enact to have a positive impact on the future. The children will be doing lots of learning based around the theme of changes during the day.

We are also running a poster competition to find the best poster on 'Changes' and we are asking you to help your child with his/her entry.

Part 1

Research your poster. Investigate or imagine the different types of changes occurring in science and the natural world around you. Choose a topic for your poster and do some research around the idea:

- What different types of change can we examine in nature?
- Carry out a science experiment and investigate the changes
- How has our world changed over the years?
- Think about how you might change the world in the future

Part 2

Make your poster. You can be as creative as you want to be!

The winners in Key Stage 1 and Key Stage 2 will get their posters printed and displayed around the school and on our website. Entries must be given in to your child's class teacher by Friday 17th March.

Thank you for your continued support and good luck!

Yours sincerely

Katie Charlton
Headteacher
